

European Union 22-26 March 2010
Sustainable Energy Week

Take a week to change tomorrow

Path-To-RES & SEC-BENCH

Discussion

Intelligent Energy  Europe

PATH-TO-RES – discussion points

- Do municipalities have the means, the know-how and the internal driving force to establish their SEAPs?
- How can national governments best support local energy planning?
- The difficulty of putting plans into action

PATH-TO-RES – questionnaire points

The most important critical success factors for successfully developing a medium- and long term energy- and climate strategy are: Indicate importance from 1 (low) to 5 (high)

The difficulty of putting SEAPs into action

How can national governments best support the local energy planning?

Specific questions related to the PATH-to-RES project

SEC-BENCH – discussion points

- Is there a need for a European, bottom-up benchmarking tool for municipal buildings?
- Possible approaches to solve the challenge of data collection
- Do municipalities have the means and know-how to follow-up the energy performance of their own buildings?

SEC-BENCH – discussion points

- Added value from a European, bottom-up benchmarking tool for municipal buildings
- The difficulty of getting control over the energy performance of municipal buildings from an organizational point of view
- How can national governments or the EU best support benchmarking of municipal buildings?
- Specific questions related to the SEC-BENCH project?
